

Altiris® 6 Migration Suite™

.....
WINDOWS MIGRATION MADE EASY

BENEFITS

- > Perform zero-touch migrations with a simple drag and drop, significantly reducing the cost and time involved when deploying, upgrading or migrating your desktops
- > Hardware and software readiness assessment allows organizations to accurately determine which upgrades are required and estimate costs prior to upgrading
- > Personality capture and migration ensures that user settings and data are retained, decreasing support calls after the upgrade and increasing user productivity
- > Software packaging, testing, conflict management, and validation ensure application reliability and compatibility
- > Executive-ready, post-migration reports help monitor the status of upgrades, detect missed computers, and highlight actual costs

Altiris® Migration Suite™ software is a complete migration solution designed to assist you with migrating to Microsoft® Windows Vista or Windows XP. Migration Suite provides pre-migration hardware and software assessment, OS deployment, software packaging and installation, personality restoration, and post-migration status reporting in a single tool.

LOWER-COST WINDOWS VISTA MIGRATIONS

There is no question that the latest version of the Windows operating system is the most stable, secure, and reliable to date, but many organizations are hesitant to upgrade because the costs to implement appear high. Migration Suite from Altiris lowers migration cost by providing the only complete, single vendor, integrated set of migration tools designed to increase automation and lower costs. With Migration Suite you get a successful Windows migration first time, every time.

ZERO-TOUCH MIGRATIONS

Reduce the need for desk side visits with Migration Suite. Altiris was the first and remains the only vendor to create a suite of products that will successfully address all the steps necessary in a successful migration—remotely. Migration Suite allows administrators to perform the following tasks from a centrally managed console reducing the need for high-cost touches.

Perform pre-migration software and hardware assessment

- > Determine which computers require resources or replacement
- > Assess the full cost of the migration

Capture computer personalities

- > Capture settings for the operating system, standard and custom applications, and the network
- > Migrate data intelligently

Clone computers and configure network settings

- > Create, deploy, and configure images remotely
- > Automate a scripted OS installation

Package and validate applications

- > Automate software installations

- > Validate and test packages to ensure compatibility with Windows Vista

Install incremental software

- > Build organization-wide applications, such as Office 2007, into the image
- > Add department-specific applications after imaging

Apply the personality to the new or re-imaged computer

- > Restore and migrate user personalities including data and configuration settings as part of the deployment process

Generate post-migration status reports

- > Track migration process using Altiris' graphical Web reports
- > Identify missing security patches with built-in reports

MEETS YOUR DEPLOYMENT AND MIGRATION NEEDS

Migration Suite simplifies desktop migrations for new or existing desktop computers. Consider Migration Suite if you are:

- > Planning a large-scale deployment or migration
- > Migrating from any version of Windows—even Windows 95—to Windows Vista/XP
- > Performing ongoing Windows migrations as a regular part of your business
- > Migrating remote offices or mobile workers
- > Performing hardware or OS technology refreshes

Upgrade now! Migration Suite makes the transition to Windows Vista easy, allowing you to perform your migration quickly, use fewer resources, and provide a quicker return on investment.

“With Altiris, we did a virtually hands-free migration across the network. It took less than one hour per machine, one-fourth the manual time, and that included upgrading other software at the same time.”

—JIM HARINGS

Global administration analyst
Rockwell Automation

Migration Suite includes hundreds of pre-packaged inventory reports, including reports to help identify the computers in your environment that require resources before they can be upgraded to Windows Vista/XP.

With the Deployment Solution™ (a component of Migration Suite) management console you can clone, configure, deploy, and migrate computers.

SYSTEM REQUIREMENTS

Migration Suite requires that you install and configure the Altiris Notification Server™.

Notification Server Minimum Requirements

- > Processor—Pentium® III 800 MHz or faster
- > Memory—1 GB RAM
- > Hard drive—20 GB
- > Operating system—Windows Server 2003 or Windows 2000 Server
- > Database—Microsoft SQL Server 2000 SP3
- > Browser—Microsoft Internet Explorer 6 or later

Altiris Agent Minimum Requirements

- > Operating system—Windows 95 or later
- > Available disk space—5 MB disk space for Altiris Agent, plus space to install required software
- > Memory—64 MB RAM
- > Browser—Microsoft Internet Explorer 4 or later

MIGRATION SUITE KEY FEATURES

- > Simplify migrations to Windows Vista/XP with easy-to-use wizards
- > Drag-and-drop jobs make batch processing of migrations simple
- > Supports Intel's Wired for Management®, including Wake on LAN®, PXE®, and BIS for zero-touch, after-hours migrations
- > Powerful scheduling coupled with support for Wake on LAN, PXE, and BIS allows administrators to leverage off hours to perform migrations
