Learn more about other products that complement RAD Studio, how you can round out your tool portfolio, and maybe even learn about tools you didn't know were part of the Embarcadero portfolio.

ER/Studio | ER/Studio helps you model and communicate the data you are using in your application. This is particularly important if you are developing in a team environment where more than one person needs to access the data models. ER/Studio Developer edition is included in the RAD Studio XE Architect edition.

Rapid SQL XE | If you ever need to write, modify or debug SQL code, Rapid SQL is a powerful SQL IDE that supports all major database platforms from a single interface.

Embarcadero DB Optimizer XE | DB Optimizer is a SQL profiling and tuning IDE that helps you find and fix SQL performance issues before you put your SQL code into production. DB Optimizer helps eliminate performance bottlenecks with graphical visualization of wait-time analysis to easily pinpoint the poor-performing SQL, continuous profiling, batch tuning and explain plans.

Embarcadero DB Change Manager XE | Change Manager helps you track and communicate database changes with modelers, DBAs, and other developers. Change Manager preserves data when making schema changes, validates synchronizations, manages reference data across Dev, Test and Production environments and aligns database versions with your app versioning system.

InterBase SMP | If the applications you are building need a small footprint, zero maintenance database for deployment, InterBase SMP is the ultimate embeddable database.

Embarcadero All-Access XE | The complete tool chest dramatically reduces the cost and complexity of acquiring, using and managing your tools. New Embarcadero® Instant-On™ technology lets you click-and-run any tool on-demand, either locally or over your network.
