Mensajes de Error

<i>“.” Expected</i>	1
<i>\$2109 Cannot initialize the BDE</i>	1
<i>\$DENYPACKAGEUNIT <> cannot be put into a package</i>	2
<i>\$DESIGNONLY and \$RUNONLY both specified</i>	2
<i>\$DESIGNONLY and \$RUNONLY only allowed in package unit</i>	3
<i>\$WEAKPACKAGEUNIT & \$DENYPACKAGEUNIT both specified</i>	4
<i>\$WEAKPACKAGEUNIT <> cannot have initialization or finalization code</i>	4
<i>\$WEAKPACKAGEUNIT <> contains global data</i>	5
<i>‘;’ not allowed before ‘Else’</i>	5
<i><> already exists</i>	6
<i><> can't be added to this package because another file with the same base name (<>) is already in the directory of the package</i>	6
<i><> clause not allowed in interface type</i>	7
<i><> directive not allowed in interface type</i>	7
<i><> expected but <> found</i>	8
<i><> has no index for fields <></i>	9
<i><> has the descendent <> in the Repository and therefore cannot be removed</i>	10
<i><> is a read-only file</i>	10
<i><> is a reserved word</i>	11
<i><> is already in the Repository. Replace it?</i>	12
<i><> is already in use by <></i>	12
<i><> is an invalid filename</i>	13
<i><> is an invalid PageIndex value. PageIndex must be between 0 and <></i>	13
<i><> is not a type identifier</i>	14
<i><> is not a unique name</i>	14
<i><> is not a valid component name</i>	15
<i><> is not a valid date</i>	16
<i><> is not a valid date and time</i>	17
<i><> is not a valid floating point value</i>	18
<i><> is not a valid floating point value for field “<>”</i>	19

<> is not a valid identifier	19
<> is not a valid integer value	20
<> is not a valid integer value for field "<>"	21
<> is not a valid path. Make sure that the path name is spelled correctly and that you are connected to the server on which the file resides.	22
<> is not a valid time.	22
<> is not a valid value for field <>. The allowed range is <> to <>.	23
<> must be saved before adding to Repository. Save now?	24
<> or <> expected but <> found	24
<> property out of range	25
{\$R*.RES} missing or incorrect	26
(<>, <>, <>, <>) is not a valid DateMonthWeek quad	26
(<>, <>, <>) is not a valid DateWeek triplet	27
16-Bit segment encountered in object file <>	27
A class named <> is already installed.	28
A CoClass must have at least one default interface	28
A CoClass must implement at least one interface	29
A component class named <> already exists	30
A component named <> already exists	31
A component named <> already exists in a descendent form.	31
A connection with the server could not be established	32
A device attached to the system is not functioning.	33
A dispinterface type cannot have an ancestor interface	33
A dispinterface type requires an interface identification	34
A field or method named <> already exists	34
A module called <> is already installed.	35
A page must be empty before it can be deleted	36
A reference to <> already exists in the Type Library	37
A required .DLL file, <>, was not found.	37
A transaction is already active	38
A user transaction is already in progress	39
A value must be specified for <>	40
A Win32 API function failed	43
Abstract method error	43
Abstract methods must be virtual or dynamic	44
Access violation (General Protection Fault)	45
Access violation at address <>. <> of address <>	48
Ambiguous overloaded call to <>	49
Ancestor component not found.	50
An error occurred while attempting to initialize the Borland Database Engine (error <>)	51
Another file named <> is already on the search path	51
Another file with the same base name (<>) is already on the search path	51
Application is not licensed to use this feature	53
Arithmetic Overflow Error	54

Array type required.	55
Assertion failed.	55
Assignment to FOR-Loop variable <>.	56
Asynchronous socket error <>.	57
At end of table.	58
Bad argument type in variable type array constructor	58
Bad global symbol definition: <> in object file <>.	60
Bad packaged unit format: <>. <>.	60
Bad unit format: <>.	61
BDE Initialization Error \$2501.	62
Before you can deploy, you must complete the Web Deployment page of the Project Web Deploy Options dialog.	63
Bitmap image is not valid	63
Bits index out of range.	64
BLOB has been modified	65
Break or Continue outside of loop	67
Breakpoint is set on line that may have been removed by the optimizer or contains no debug information. Run anyway?	70
Call to Application.CreateForm is missing or incorrect	70
Call to RegisterClass is missing or incorrect	72
Can't change value while socket is active	72
Can't compile Complib. Too many files in project.	73
Can't delete or change record. Since related record exists in table = 'xxx', referential integrity rules would be violated	73
Can't load [complib.dcl, cmplib32.dcl, vcl30.dpl, vcl40.bpl, vcl50.bpl, vcl.bpl].	74
Can't load package <>. <> One of the library files needed to run this package cannot be found.	75
Can't load package <>. The specified module could not be found.	76
Can't write .EXE file. Disk full?.	77
Cannot add a session to the form or data module while session <> has AutoSessionName enabled	78
Cannot assign to a read-only property	78
Cannot break, continue, or exit out of a finally clause	79
Cannot change the size of an icon	80
Cannot change Visible in OnShow or OnHide	80
Cannot complete a class with incomplete methods implementations	82
Cannot connect, <> must contain a valid ServerName or ServerGUID	83
Cannot connect to database <>.	83
Cannot copy a Repository Project to a directory underneath itself	84
Cannot create cursor handle	85
Cannot create file <>.	85
Cannot create form. No MDI forms are currently active	87
Cannot create Window	88
Cannot debug project unless a host application is defined. Use the Run Parameters. . . dialog box.	88
Cannot enable AutoSessionName property with more than one session on a form or data module.	89
Cannot find <> on the search path.	90
Cannot find Engine configuration file.	91

Cannot find implementation of method <>	92
Cannot find server	92
Cannot focus a disabled or invisible window	93
Cannot hide an MDI Child Form	94
Cannot inherit from form <>. It contains a component with a blank name property	95
Cannot initialize local variables	95
Cannot initialize multiple variables.	97
Cannot initialize thread local variables.	97
Cannot Load IDAPI Service Library	98
Cannot load IDAPI[32].DLL.	100
Cannot load language driver	101
Cannot load package <>. It contains unit <> which is also contained in package <>.	102
Cannot locate IDAPI[01,32].DLL	102
Cannot make a visible window modal.	105
Cannot modify a read-only dataset	106
Cannot modify SessionName while AutoSessionName is enabled.	106
Cannot open component library <Path>\Complib.dcl	107
Cannot open file <>	107
Cannot open module because it is a dependent of <>, which is open as text	108
Cannot optimize. Not an .exe	108
Cannot override a static method	109
Cannot perform operation - DB is not open.	110
Cannot perform this operation on a closed connection	110
Cannot perform this operation on a closed database	111
Cannot perform this operation on a closed dataset	112
Cannot perform this operation on an active session.	114
Cannot perform this operation on an empty dataset	114
Cannot perform this operation on an open database	115
Cannot perform this operation on an open dataset	116
Cannot perform this operation with table open	117
Cannot perform utility while table is in use	117
Cannot read a write-only property	117
Cannot Run a Unit or DLL	119
Cannot update, <> is not owned by <>	120
Cannot use array of Field values with Expression Indices	120
Cannot use reserved unit name <>	121
Cannot write EXE or DLL to disk	121
Cannot Write to Engine Configuration File	121
Capability Not Supported.	122
Case label outside of range of case expression	124
Circular datalinks are not allowed	126
Circular Unit Reference [to <>].	126
Class <> not found. [Ignore the error and continue?]	128
Class already has a default property	129

<i>Class does not have a default property</i>	130
<i>Class, interface and object types only allowed in type section</i>	131
<i>Class methods not allowed as property getters and setters</i>	132
<i>Class not registered.</i>	133
<i>Class or object types only allowed in type section.</i>	134
<i>Class type required</i>	135
<i>Clipboard does not support Icons</i>	136
<i>Close error on <Filename></i>	136
<i>Code Insight features are disabled while debugging</i>	137
<i>Code Segment Too Large</i>	137
<i>COINITIALIZE has not been called</i>	138
<i>Column not a BLOB.</i>	138
<i>Comma Expected.</i>	138
<i>Compilation terminated; too many errors.</i>	139
<i>Component already installed</i>	139
<i>Connection error—no server available</i>	140
<i>Connection in use by another statement</i>	141
<i>Connection name missing.</i>	142
<i>Constant expression expected</i>	143
<i>Constant expression violates subrange bounds</i>	143
<i>Constant object cannot be passed as var parameter</i>	144
<i>Constant or type identifier expected</i>	146
<i>Constant out of range</i>	147
<i>Constants cannot be used as open array arguments</i>	148
<i>Constructing Instance of <> containing abstract methods.</i>	149
<i>Constructors and Destructors must have register calling convention</i>	150
<i>Constructors and Destructors not allowed in OLE automation section</i>	151
<i>CONTAINS clause is incorrect</i>	151
<i>Control <> has no parent window.</i>	153
<i>Controls cannot be added to a data module</i>	154
<i>Corrupt table/index header</i>	155
<i>Could not create output file <></i>	156
<i>Could not find IDataBroker in type library</i>	157
<i>Could not find interface <> in type library.</i>	158
<i>Could not find interface IDataBroker in type library</i>	158
<i>Could not find language driver (\$220B).</i>	159
<i>Could not find object. Cannot load an IDAPI service library. File: ODBC32.DLL.</i>	159
<i>Could not initialize IDAPI.</i>	160
<i>Could not load <>. The OLE control may possibly require support libraries that are not on the current search path or are not present on your system.</i>	161
<i>Could not load RLINK32.DLL</i>	161
<i>Could not load StdOle version 1.0 type library</i>	161
<i>Could not load Type Library.</i>	162
<i>Could not load unit <> symbol information for <> Do you want to try to find this file yourself?</i>	162

<i>Couldn't perform the edit because another user changed the record</i>	163
<i>Data Base Error: Database access resulted in error.</i>	163
<i>Data Segment Too Large</i>	164
<i>Data Structure Corruption</i>	166
<i>Data Type too large: exceeds 2 GB</i>	168
<i>Database name missing</i>	168
<i>Database not Assigned</i>	169
<i>Dataset is not a query</i>	170
<i>Dataset not configured for network access</i>	171
<i>Dataset [is] not in edit or insert mode</i>	171
<i>DAX Error: Class not registered.</i>	172
<i>DAX Error: Name not unique in this context</i>	173
<i>DAX Error: Unexpected failure</i>	173
<i>DCOM not installed</i>	173
<i>Debug process is already running</i>	173
<i>Debug session in progress. Terminate?</i>	174
<i>Debugger kernel error. Error code: <></i>	175
<i>Declaration expected but <> found</i>	176
<i>Declaration of <> differs from declaration in interface <></i>	177
<i>Declaration of <> differs from previous declaration</i>	177
<i>Declaration of class <> is missing or incorrect</i>	178
<i>DEFAULT clause not allowed in OLE automation section</i>	179
<i>Default parameter '<>' must be by-value or const</i>	179
<i>Default property must be an array property</i>	180
<i>Default value required for <></i>	181
<i>Default values must be of ordinal, pointer, or small set type</i>	181
<i>Destination must be indexed</i>	183
<i>Directory Is Busy</i>	184
<i>Directory is controlled by other .NET file</i>	185
<i>Disk Error.</i>	188
<i>Disk full.</i>	188

<i>Missing Connection or Connection String</i>	379
<i>Missing Data Provider or Data Packet</i>	380
<i>Missing ENDIF directive</i>	381
<i>Missing operator or semicolon</i>	381
<i>Missing or invalid conditional symbol in <\$> directive</i>	383
<i>Missing parameter type</i>	383
<i>Missing right quote</i>	384
<i>Missing TableName property</i>	384
<i>Module <>'s time/date changed. Reload?</i>	385
<i>Module header is missing or incorrect</i>	386
<i>Multiple Net Files found</i>	387
<i>Multiple Paradox Net files found/in use</i>	389
<i>Must apply updates before refreshing data</i>	389
<i>Name conflicting</i>	390
<i>Name not unique in this context</i>	390

<i>Need to specify at least one dimension for SetLength of dynamic array.</i>	391
<i>Never-build package <> must be recompiled</i>	391
<i>Never-build package <> requires always-build package <></i>	392
<i>New not supported for dynamic arrays—use SetLength</i>	392
<i>No address specified</i>	393
<i>No argument for format <></i>	393
<i>No code was generated for the current line.</i>	394
<i>No Databases Are Listed In Transaction Component</i>	395
<i>No definition for abstract method <> allowed.</i>	395
<i>No fields defined—cannot create dataset</i>	396
<i>No frames in project</i>	397
<i>No index currently active</i>	397
<i>No MDI forms are currently active</i>	398
<i>No MDI Parent Active</i>	398
<i>No overloaded method of <> with this parameter list exists</i>	398
<i>No Provider Available</i>	399
<i>No SQL statement available</i>	400
<i>No user transaction is currently in progress.</i>	401
<i>No Web browser could be located</i>	402
<i>NODEFAULT clause not allowed in OLE automation section</i>	402
<i>Not enough actual parameters</i>	403
<i>Not enough file handles.</i>	404
<i>Not exact read/write in <>.mb and <>.mb</i>	405
<i>Not in cached update mode</i>	405
<i>Not initialized for accessing network files.</i>	406
<i>Number is out of range</i>	408
<i>Number of elements differs from declaration</i>	408
<i>Object Factory for TwebResponse Missing</i>	409
<i>Object or class type required</i>	409
<i>OLE error 800A03EC</i>	410
<i>One or more lines were too long and have been truncated</i>	411
<i>Only one of a set of overloaded methods can be published</i>	411
<i>Only one TIDAntiFreeze can exist per application</i>	412
<i>Only register calling convention allowed in OLE automation section</i>	413
<i>Operation not allowed on a unidirectional dataset</i>	413
<i>Operation not allowed on sorted string list</i>	414
<i>Operation not applicable</i>	415
<i>Operation not supported</i>	416
<i>Operator not applicable to this operand type.</i>	417
<i>ORA-1001 invalid cursor</i>	419
<i>Order of fields in record constant differs from declaration</i>	420
<i>Ordinal type required</i>	421
<i>Out of memory</i>	422
<i>Out of system resources</i>	423

Overflow in conversion or arithmetic operation	424
Overloaded procedure <> must be marked with the overload directive	424
Overriding automated virtual method <> cannot specify a dispid	425
Package <> already contains unit <>	425
Package <> can't be installed because another package with the same base name is already loaded (<>) . . .	425
Package <> can't be installed because it is not a design time package	426
Package <> is recursively required.	427
Package unit <> cannot appear in contains or uses clauses	427
Packages <> and <> both contain unit <>	428
PACKED not allowed here.	428
Page Fault in module <> at <>	429
Page name cannot be blank.	429
Param <> not found.	430
Parameter <> not allowed here due to default value	430
Parameter <> not found.	431
Parameters of this type cannot have default values	431
Parent Interface must be Dispatchable for dual interface.	432
Passthrough SQL connection must be shared	432
Path not found. File <>	432
Path too long	433
Pointer type required	433
Preparation of default expression failed with error "Type mismatch in expression"	434
Previous declaration of <> was not marked with the 'overload' directive	435
Printing in Progress	435
Procedure cannot have a result type	436
Procedure FAIL only allowed in constructor	437
Procedure, function or property expected.	437
Procedure or Function expected	438
Procedure or Function name expected	439
Program or unit <> recursively uses itself	439
Project <> raised exception class <> with message <>. Process stopped. Use Step or Run to continue.	440
Property <> does not exist in base class.	441
Property <> inaccessible here	442
Property does not exist	443
Property getters and setters cannot be overloaded	443
Property overrides not allowed in interface type	444
Provider name was not recognized by the server	444
Published field <> not a class nor interface type	445
Published property <> cannot be of type <>	446
Published real[48] property <> must be Single, Double, or Extended	446
PutObject to undefined item	447
Query Is Too Complex.	447
Query makes no sense	448
Query may take a long time to process	449

Range check error	449
Read failure. File: <>.val	450
Read or Write clause expected but identifier <> found	450
Record already locked by this session	451
Record changed by another user	451
Record Key deleted	452
Record/Key Deleted.	452
Record Locked by another User	453
Record, object or class type required	453
Recursive include file <>	454
Redeclaration of <> hides a member in the base class	454
Redeclaration of property not allowed in OLE automation section	455
Required package <> not found	455
REQUIRES clause is incorrect.	456
Re-raising an exception only allowed in exception handler	456
Resource <> not found	457
Segment/Offset pairs not supported in Borland 32-bit Pascal	458
Selection contains a component introduced in an ancestor form which cannot be deleted	458
Server Execution Failed	460
Session name missing	460
Sets may have at most 256 elements	461
Share not loaded. It is required to share local files	462
Size mismatch error	463
Size of published set <> is greater than [4 bytes, 32 bits]	463
Slice standard function is only allowed as open array argument.	464
Socket Error # 10061 – Connection Refused.	465
Socket Error # 10065 – No route to host	465
Socket Error # 11001 – Host not found	466
SQL Connection timed out	466
SQL Dialect Invalid	467
SQL is too complex	467
Stack overflow	468
Statement expected, but expression of type <> found.	469
Statements not allowed in interface part	469
STORED clause not allowed in OLE automation section	470
Stream Read Error	470
String constant truncated to fit STRING[]	471
String [literal]s may have at most 255 elements	471
Syntax Error in Field Definition	472
Syntax error in query. Incomplete query clause	473
Syntax error in real number.	474
System unit out of date or corrupted	474
Table cannot be opened for exclusive use	475
Table corrupt—other than header	476

<i>Table does not exist.</i>	476
<i>Table does not support this operation.</i>	477
<i>Table is busy</i>	478
<i>Table is full</i>	479
<i>Table is not indexed.</i>	480
<i>Table is read only</i>	481
<i>Table or View does not exist</i>	482
<i>TActiveFormX declaration missing or incorrect</i>	482
<i>Text after final END</i>	483
<i>The <>.EXE file is linked to missing export <>.DPL:<></i>	483
<i>The <> method referenced by <>. <> does not exist. Remove the reference?.</i>	484
<i>The <> method referenced by <>. <> has an incompatible parameter list. Remove the reference?.</i>	486
<i>The application or DLL <> is not a valid Windows image. Please check this against your installation diskette.</i>	486
<i>The changes you requested to the table were not successful because they would create duplicate values in the index, primary key, or relationship. Change the data in the field or fields that contain duplicate data, remove the index, or re-define the index to permit duplicate entries and try again.</i>	487
<i>The Edit Buffer of <> is marked read-only</i>	487
<i>The Master Source property of <> must be linked to a DataSource.</i>	488
<i>The OLE control may possibly require support libraries that are not on the current search path or are not present on your system.</i>	488
<i>The package already contains unit named <></i>	489
<i>The package already requires a package named <></i>	489
<i>The page cannot be displayed</i>	490
<i>The path entered does not exist</i>	490
<i>The procedure entry point <> cannot be found in the dynamic link library <>.DLL</i>	491
<i>The project already contains a form or module named <>.</i>	491
<i>The Resource DLL Wizard requires a project to be open</i>	492
<i>The search string cannot be blank</i>	493
<i>The selected bitmap is larger than 24x24</i>	493
<i>The server returned an invalid response.</i>	494
<i>The transaction isolation level must be dirty read for local databases</i>	494
<i>The type library has syntax errors.</i>	495
<i>There is currently no active project</i>	496
<i>There is no default printer currently selected.</i>	496
<i>There is no overloaded version of <> that can be called with these arguments</i>	496
<i>This form of method call only allowed for class methods</i>	497
<i>This form of method call only allowed in methods of derived types</i>	499
<i>This package already contains unit named <></i>	500
<i>This type cannot be initialized</i>	500
<i>Thread local variables cannot be ABSOLUTE</i>	501
<i>Thread local variables cannot be local to a function</i>	501
<i>Token not found</i>	502
<i>Token not found. Token :dbo. line number: l</i>	502
<i>Too many actual parameters</i>	503

<i>Too many connections</i>	503
<i>Too many files open</i>	504
<i>Too many locks on table</i>	505
<i>Too many open cursors</i>	505
<i>Too many open files</i>	506
<i>Too many parameters</i>	506
<i>Transaction Is Active</i>	507
<i>Transaction not Assigned</i>	508
<i>Translate error, value out of bounds</i>	508
<i>Tried to search marked block but it is invalid</i>	509
<i>Type <> has no type info</i>	509
<i>Type <> is not yet completely defined</i>	510
<i>Type <> must be a class to have a PUBLISHED section</i>	510
<i>Type <> must be a class to have OLE automation</i>	511
<i>Type <> needs finalization—not allowed in file type</i>	512
<i>Type expected but <> found</i>	512
<i>Type expected but real constant found</i>	513
<i>Type mismatch for field <FieldName>, expecting: <Field type>, actual: <Field type></i>	514
<i>Type mismatch [in expression]</i>	514
<i>Type not allowed in OLE Automation call</i>	515
<i>Type of expression must be BOOLEAN</i>	515
<i>Type of expression must be INTEGER</i>	516
<i>TYPEINFO standard function expects a type identifier</i>	516
<i>TYPEOF can only be applied to object types with a VMT</i>	517
<i>Types of actual and formal var parameters must be identical</i>	518
<i>Unable to Execute a Query</i>	519
<i>Unable to find both a form and a source file</i>	519
<i>Unable to insert a line</i>	519
<i>Unable to load GDS[32].DLL</i>	520
<i>Unable to load RPTSMITH.EXE</i>	520
<i>Undeclared Identifier: <></i>	521
<i>Undeclared Identifier: 'EmptyParam'</i>	525
<i>Undeclared Identifier: 'Result'</i>	526
<i>Undeclared Identifier: 'Unassigned'</i>	526
<i>Undeclared Identifier: 'VarToStr'</i>	526
<i>Unexpected end of command</i>	526
<i>Unit <> was compiled with a different version of <></i>	527
<i>Unit File Format Error</i>	528
<i>Unit name mismatch: <></i>	528
<i>Unit version mismatch: <></i>	528
<i>Unknown Column</i>	529
<i>Unknown database</i>	529
<i>Unknown directive: <></i>	531
<i>Unknown directive (already exists)</i>	533

<i>Unknown Identifier</i>	533
<i>Unknown picture file extension: <></i>	534
<i>Unknown SQL Error</i>	534
<i>Unknown user name or password</i>	535
<i>Unnamed arguments must precede named arguments in OLE Automation call</i>	536
<i>Unrecognized database parameter block</i>	537
<i>Unsatisfied forward or external declaration: <></i>	537
<i>Unsupported 16bit resource</i>	538
<i>Unterminated string</i>	539
<i>USES clause is missing or incorrect</i>	539
<i>Validation error for column <Column Name>, value <***Null***></i>	539
<i>Variable <> inaccessible here due to optimization</i>	541
<i>Variable name expected</i>	541
<i>Variable required</i>	542
<i>Variant does not reference an automation object</i>	542
<i>Variant does not reference an OLE object</i>	543
<i>Variant error</i>	544
<i>Variant is not an array</i>	544
<i>Vendor initialization failure: ORA[NT]7[1,2,3].DLL</i>	545
<i>Windows socket error: <> on API <></i>	545
<i>Windows Socket Error: (10060), on API connect</i>	546
<i>Write error on <></i>	546
<i>You cannot add a <> to the current project because it is not an ActiveX library. Click OK to start a new ActiveX library project</i>	546
<i>You cannot specify a size for a field of this type</i>	547
<i>You must open a project before you can add an Automation Object</i>	547
<i>You must select a VCL class</i>	548
<i>Your application is not enabled for use with this driver</i>	548
<i>Your username and password are not defined. Ask your database administrator to set up an InterBase login</i>	549
