

# RAD Studio XE6

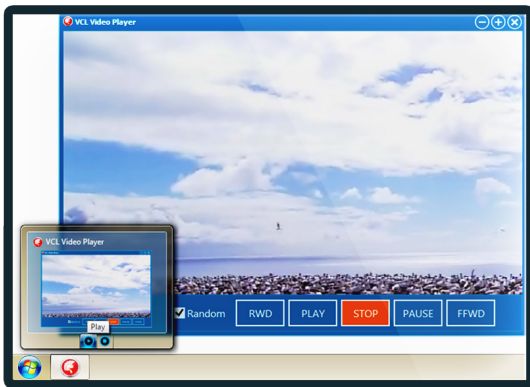

The complete app development suite for Windows, Mac, iOS and Android

Embarcadero® RAD Studio XE6 is the complete software development solution for building true native applications for Windows, Mac, iOS and Android from a single codebase. Develop high performance, multi-device, compiled native applications that deliver the best user experience. Extend your Windows applications with mobile companion apps and easily connect with enterprise data, cloud and BaaS services.

## Multi-Device, True Native

RAD Studio multiplies developer productivity, enabling your team to develop multi-device apps for Windows, Mac, iOS, and Android using a single tool, single programming language and single framework, in record time. This unique combination of multi-device development and true native code means fast development with no scripting languages or virtual machines getting in the way of awesome app performance.

## Modernize your Windows Applications

Bring your Windows applications forward by applying an updated Windows 7 or 8.1 custom look with new VCL styles and Windows Taskbar component. Access device sensors with new VCL components. Extend your existing Windows VCL applications to mobile by easily creating connected mobile and wearable companion apps with new app tethering components.

## Here's what you can do with RAD Studio XE6

Develop apps for Windows, Mac, iOS and Android using the tools and languages you know and trust.

Push the envelope of performance with 64-bit Windows to take advantage of the latest hardware and more memory.

Get FireDAC high performance enterprise database connectivity and make database app development fun again.

Connect with popular cloud services with REST as well as BaaS providers for push notifications, authentication, storage and more!

Bind any UI control to other objects or datasets. With LiveBindings, every component is data aware.

Develop enterprise applications with DataSnap integrated multi-tier architecture.

### Delphi XE6

The fastest way to build native apps for Windows, Mac, iOS and Android

### C++Builder XE6

Multi-device C++ development for Windows, Mac, iOS and Android

### HTML5 Builder

Multi-device web and mobile web app development

### InterBase XE3

Multi-device embeddable database

## RAD Studio is available in four editions

Professional	Enterprise	Ultimate	Architect
RAD Studio XE6 Professional is the complete software development solution for building true native applications for Windows, Mac, iOS and Android from a single codebase. Develop high performance, multi-device, compiled native applications with local embedded databases that deliver the best user experience.	RAD Studio XE6 Enterprise is the complete app development solution for ISVs and enterprises to create multi-device applications for Windows, Mac, iOS and Android with client/server and n-tier capabilities. RAD Studio Enterprise includes everything in the Professional edition, plus enterprise data connectivity, mobile app development and multi-tier application development.	RAD Studio XE6 Ultimate is the complete app development solution for enterprises that need to create database-intensive apps that interface with enterprise database systems. RAD Studio Ultimate includes everything in RAD Studio Enterprise edition plus DB PowerStudio Developer edition SQL coding, profiling and tuning tools.	RAD Studio XE6 Architect is complete app development solution for enterprises building multi-device, true native applications that integrate with enterprise database systems. RAD Studio Architect includes everything in the Enterprise edition plus powerful ER/Studio Developer Edition database modeling and forward / reverse database engineering capabilities.

## RAD Studio XE6 System Requirements

- 1 GB RAM (2 GB+ recommended)
- 3-44 GB free hard disk space depending on edition and configuration
- DVD-ROM drive (if installing from a Media Kit DVD)
- Basic GPU – Any vendor DirectX 9.0 class or better (Pixel Shader Level 2)
- Intel® Pentium® or compatible, 1.6 GHz minimum (2GHz+ recommended)
- 1024x768 or higher-resolution monitor
- Mouse or other pointing device
- Microsoft® Windows 8 or 8.1 (32-bit and 64-bit)
- Microsoft® Windows 7 SP1 (32-bit and 64-bit)
- Microsoft® Windows Vista™ SP2 (32-bit and 64-bit) requires administrator rights
- Microsoft® Windows Server® 2008 and 2012 (32-bit and 64-bit)
- RAD Studio can also be run on Mac OS X by using a virtual machine (VM) such as VMware Fusion or Parallels hosting Windows Vista, 7 or 8

## For developing 64-bit Windows applications      For developing Mac OS X applications      For developing iOS applications      Supported Deployment Platforms

PC running a 64-bit version of Windows or a 32-bit development PC connected with a PC running a 64-bit version of Windows	PC running Windows connected with an Intel-based Mac or a Mac running Windows in a VM, with 2 GB RAM or more, running OS X 10.9 (Mavericks) or 10.8 (Mountain Lion)	PC running Windows connected with an Intel-based Mac or a Mac running Windows in a VM, with 2 GB RAM or more, running OS X 10.9 or 10.8 with the latest version of Xcode that supports iOS 6.x or later. An Apple Developer account is required to deploy iOS apps to physical devices.	PCs and tablets with Intel/AMD processors running Windows Vista, 7, 8.x or later. Macs running OS X 10.8 or later. iPhone 3GS or later, iPad, or iPod Touch 4th Generation or later running iOS 6.0 or later. Android phones and tablets: ARMv7 devices with NEON support, running Android Gingerbread (2.3.3-2.7), Ice Cream Sandwich (4.0.3, 4.0.4), Jelly Bean (4.1.x, 4.2.x, 4.3.x), KitKat (4.4x) or later.
